

INTERNATIONAL SEARCH REPORT

Int. Application No PCT/US2004/032599
--

A. CLASSIFICATION OF SUBJECT MATTER C12N15/82 C12N9/04

According to International Patent Classification (IPC) or to both national classification and IPC.
--

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols) C12N
--

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used) EPO-Internal, WPI Data, PAJ, BIOSIS, EMBASE, CHEM ABS Data
--

C. DOCUMENTS CONSIDERED TO BE RELEVANT
--

Category	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No
P, X	<p>TIEMAN, DENISEM.: "Identification of genes involved in tomato volatile synthesis" AMERICAN SOCIETY OF PLANT BIOLOGISTS, Online! no. 258, XP002339006 Retrieved from the Internet: URL :http://abstracts.aspb.org/pb2004/publ_index/M03/9103.html> 'retrieved on 2005-07-13! the whole document</p> <p style="text-align: center;">-/-</p>	1-7, 18-72, 76-79, 82-93

<input checked="" type="checkbox"/> Further documents are listed in the continuation of box C.
--

<input checked="" type="checkbox"/> Patent family members are listed in annex

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "B" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the International filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family

Date of the actual completion of the international search

Date of mailing of the international search report

A	STARK D ET AL: "Inhibition aspects of the byconversion of L-phenyl alanine to 2-phenylethanol by <i>Saccharomyces cerevisiae</i> ." ENZYME AND MICROBIAL TECHNOLOGY, vol. 32, no. 2, 3 February 2003 (2003-02-03), pages 212-223, XP002339948 ISSN: 0141-0229 figure 1 -----	1-7, 18-72, 76-79, 82-93

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US20 04/Q3259 9

Box No. I Nucleotide and/or amino acid sequence(s) (Continuation of item 1.b of the first sheet)

1. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, the international search was carried out on the basis of
 - a. type of material
 - a sequence listing
 - table(s) related to the sequence listing
 - b. format of material
 - in written format
 - in computer readable form
 - c. time of filing/furnishing
 - contained in the international application as filed
 - filed together with the international application in computer readable form
 - furnished subsequently to this Authority for the purpose of search
2. In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished
3. Additional comments.

INTERNATIONAL SEARCH REPORT

national application No.
PCT/US2004/032599

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. P j Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:

2. Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:

3. D Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. I As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.

2. J As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:

4. I Y No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

1-7, 18-67 (partially), 68-72, 76-77 (partially), 78-79, 82-93

Remark on Protest

The additional search fees were accompanied by the applicant's protest.

I No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-7, 18-67(partially), 68-72, 76-77(partially), 78-79,
82-93

Relates to an isolated polynucleotide encoding a plant
2-phenylethanol dehydrogenase.

2. claims: 8-17, 18-67(partially), 73-75, 76-77(partially), 80-93

Relates to an isolated polynucleotide encoding a plant
phenylal anine decarboxyl ase.
